Brand New Book ***** Print on Demand *****.Excerpt from How to Tell the Trees and Forest Endowment of Pacific Slope Some Hints upon Forestry, issued for the California Federation of Women s Clubs, in 1900, contained the following suggested topics for study and discussion: - 1. Forest trees, their names, appearance, habits, manner of growth, uses, etc. 2. Distribution, where found and reasons why so located, nature of soils, exposure, etc. 3. Enemies of trees, animate and inanimate, including man, their worst enemy. 4. Effects of forests upon climate, conservation of moisture, preventing both floods and drought. 5. Reforestation, its value both economical and esthetic, supplying man with needed materials for his development, and preventing his deterioration. 6. Necessary attention and education, then legislation and practical application, etc. In harmony with these brief hints, I invited one with whom I have studied the trees in their homes for over twenty years to elaborate is the first of the above hints. The result is this booklet - How to Tell the Trees - with Matchless Forest Endowment for introduction; the final pages are devoted to...
