

Reconstructing Sustainability Science: Knowledge and Action for a Sustainable Future (Paperback)

By Thaddeus R. Miller

Taylor Francis Ltd, United Kingdom, 2014. Paperback. Book Condition: New. New.. 226 x 152 mm. Language: English . Brand New Book. The growing urgency, complexity and wickedness of sustainability problems-from climate change and biodiversity loss to ecosystem degradation and persistent poverty and inequality-present fundamental challenges to scientific knowledge production and its use. While there is little doubt that science has a crucial role to play in our ability to pursue sustainability goals, critical questions remain as to how to most effectively organize research and connect it to actions that advance social and natural wellbeing. Drawing on interviews with leading sustainability scientists, this book examines how researchers in the emerging, interdisciplinary field of sustainability science are attempting to define sustainability, establish research agendas, and link the knowledge they produce to societal action. Pairing these insights with case studies of innovative sustainability research centres, the book reformulates the sustainability science research agenda and its relationship to decision-making and social action. It repositions the field as a science of design that aims to enrich public reasoning and deliberation while also working to generate social and technological innovations for a more sustainable future. This timely book gives students, researchers and practitioners a valuable and...
