Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Auditing Studies, 1917 In the preparation of students for entrance into the profession of accountancy the teacher has to meet the criticism that such students are only theoretically trained. Theory is the logical foundation for practice; however, theory alone does not make for success any more than does practice without theory. The ideal instruction seems to combine theory with practice. It is with the idea of supplementing the theory contained in the authors text on auditing that the material in this syllabus has been arranged. From Principles of Auditing one may learn the theory as set forth therein. Through the use of Auditing Studies one may see the application of the principles to the problems as they arise in practice. If the work is carried out in the study as outlined in the text the student should have a fairly complete set of working papers. To the classroom student even laboratory practice based on experience is theoretical and to such students so this study will appear. It is, however, to this class, that this work will be most helpful since it will enable them to take along into the field a set of working papers for reference purposes.
