Color choice as a function of waveform and force-feedback vibration

By Jeffrey Howard

LAP Lambert Acad. Publ. Sep 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - This scientific investigation highlights the relationship between visual stimulus sinusoidal spatial frequency, force-feedback (FF) square, triangle, and sinusoidal wave driven vibrational periodicities, and their association with the visible light spectrum colors red, orange, yellow green, blue indigo, and violet. A customized FF joystick program presented randomly ordered .01, .015, .03, .045, and .09 seconds-per-cycle period FF vibrations while soliciting participant color-choice. Each vibration was randomly presented 10 times across 50 trials. Analyses indicate significant but differing color-association preferences for square, triangle, and sine waveform driven vibrations. 100 pp. Englisch.

Reviews

Very good eBook and valuable one. This is for anyone who statts that there was not a worth reading. You will not truly feel monotony at at any time of your own time (that's what catalogs are for concerning if you question me).

-- Ms. Ona Muller

The ebook is straightforward in study better to fully grasp. It is actually loaded with knowledge and wisdom I am just delighted to tell you that here is the best pdf i have read through during my very own lifestyle and may be he greatest ebook for at any time.

-- Dr. Karelle Glover
